

Electrical Equipment Safety System

Electrical Equipment Safety System: *In-scope electrical equipment definitions, and risk levels*

Current: July 2021, version 4.1 – aligns to AS/NZS 4417.2:2020 edition

PREFACE

In-scope electrical equipment is low voltage electrical equipment that is:

- rated at a voltage greater than 50 V AC RMS or 120 V ripple-free DC (low voltage)
- rated at a voltage less than 1000 V AC RMS or 1500 V ripple-free DC (high voltage), and
- designed or marketed as suitable for household, personal or similar use.

It is immaterial whether the equipment is also designed or marketed for commercial or industrial purposes.

In-scope equipment must meet certain requirements based on the identified risk level of the equipment. These levels are broken into three risk level classifications:

- Level 3 in-scope electrical equipment (high risk). This equipment must:
 - be electrically safe and meet the relevant standard
 - be marked with the Regulatory Compliance Mark (RCM)
 - have a valid Australian or New Zealand issued certificate of conformity, and
 - be registered in the national EESS database and linked to the registered responsible supplier.
- Level 2 in-scope electrical equipment (medium risk). This equipment must:
 - be electrically safe and meet the relevant standard
 - be marked with the Regulatory Compliance Mark (RCM)
 - be registered in the national EESS database and linked to the registered responsible supplier, and
 - have a compliance folder which is to be kept with the registered responsible supplier and be made available, upon request, within 10 days.
- Level 1 in-scope electrical equipment (low risk). This equipment must:
 - be electrically safe and meet the relevant standard
 - be marked with the Regulatory Compliance Mark (RCM)
 - have documentary evidence in English, to show that the item meets the relevant standard at the time the item was either manufactured or imported ¹ and
 - be linked to the registered responsible supplier.

Definitions of in-scope electrical equipment contained herein are a citing of, inclusion to, or where a definition is in force and is to be altered, redefined or similar in, the *AS/NZS 4417.2* (the defining standard). ⁴

¹ Evidence must be kept by the responsible supplier for a period of five years from the last day the item is either manufactured or imported by the responsible supplier.

<p>Air conditioner incorporating flammable refrigerant</p> <p>An electrical appliance that—</p> <ul style="list-style-type: none"> (a) is for household use; and (b) incorporates motor compressors; and (c) is an electrical appliance designed to provide delivery of conditioned air to an enclosed space, room or zone; and (d) includes a refrigeration system for cooling, heating or dehumidifying the air, including hydronic room fan coil type systems; and (e) is portable, transportable or fixed; and (f) uses refrigerant having a flammability classification of Class 2 or Class 3 in accordance with ISO 817. For refrigerant blends that have more than one flammability classification, the most unfavourable classification is taken. <p>Class specification: AS/NZS 60335.2.40</p>	X			
<p>Air conditioner incorporating non-flammable or low flammable refrigerant</p> <p>An electrical appliance that—</p> <ul style="list-style-type: none"> (a) is for household use; and (b) incorporates motor compressors; and (c) is an electrical appliance designed to provide delivery of conditioned air to an enclosed space, room or zone; and (d) includes a refrigeration system for cooling, heating or dehumidifying the air, including hydronic room fan coil type systems; and (e) is portable, transportable or fixed; and (f) uses a refrigerant having a flammability classification of Class 1 or Class 2L in accordance with ISO 817. For refrigerant blends that have more than one flammability classification, the most unfavourable classification is taken. <p>Note For example if a refrigerant blend has a flammability classification of A2/A2L then the blend is considered to be a flammable refrigerant and the appliance is as described in 'Air conditioner incorporating flammable refrigerant'</p>		X		

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
Class specification: AS/NZS 60335.2.40				
Appliance connector An electrical device that— (a) is for attachment to a flexible cord; and (b) makes a detachable connection between the conductors of the cord and the pins or contacts of any low voltage appliance or equipment of a type intended or generally used for household applications; but does not include— (c) a connector within the scope of AS/NZS 3123; or (d) a plug or socket-outlet within the scope of AS/NZS 3131. Class specification: Appliance coupler—AS/NZS 60320.1 Sewing machine appliance coupler—AS/NZS 60320.2.1 Interconnection appliance coupler—AS/NZS 60320.2.2	X			
Arc welding machine An electrical appliance that— (a) is for use in the electric arc welding process; (b) is for connection to single phase low voltage supply; (c) is fitted with a flexible cord and plug rated at not more than 16 A; (d) can easily be moved from one place to another while it is connected to supply; and (e) has, for GMAW (gas metal arc welding), GTAW (gas tungsten arc welding), and FCAW (flux cored arc welding) machines, a 100% output rating not exceeding 65 A. The 100% rating is calculated from the square root of the marked duty cycle expressed in decimal form multiplied by the marked output current associated with the duty cycle in amperes; but does not include— (f) an arc welding machine promoted exclusively to industry. Class specification:	X			<i>* For Class Specification for certification requirements, please refer to the Information bulletins (Information and Advisory notices on the EESS website)</i>

	3	2	1	
AS 60974.6 for Australia				
Bayonet lampholder An electrical device that - (a) accommodates a lamp with a bayonet cap of 15 mm or 22 mm nominal diameter; but does not include— (b) a lampholder that by design is restricted to specific appliances by forming part of a structural moulding of the appliance. This exclusion does not apply to lampholders that can be used in luminaires; or (c) a lampholder that is for incorporation in industrial equipment only. Class specification: AS/NZS 3117 or AS/NZS 61184	X			
Beauty care lamp An electrical appliance that— (a) is a household type; (b) produces optical radiation for personal, cosmetic or nail hardening purposes; and (c) is portable Class specification: AS/NZS 60335.2.27 (or appliances for skin exposure to optical radiation) AS/NZS 60335.2.113 (or cosmetic and beauty care appliances incorporating lasers and intense light sources) AS/NZS 60335.2.23 plus exempt group limits from AS/NZS 62471 (for nail hardeners)	X			. Previously named “Therapeutic lamp”.
Blanket An electrical appliance that— (a) is for application of heat to a bed; (b) is flexible; (c) has a fabric enclosure; and	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
(d) has a projected surface area exceeding 0.6 m ² ; and includes— (e) any associated power supply or controller. Class specification: AS/NZS 60335.2.17				
Bread toaster An electrical appliance that— (a) is a household type; and (b) is for toasting bread or similar foods. Class specification: AS/NZS 60335.2.9	X			
Building wiring cable A single or multicore electric cable insulated with polymeric materials that – a) has one to five conductors of stranded or solid cores of copper conductors; b) has an insulated and laid up flat or circular configuration c) is sheathed or unsheathed d) has active phase conductors with nominal cross-sectional area 0.5mm ² to 16mm ² e) has an insulation designation of V-75, V-90, V-90HT or X-90; and f) is intended for use in electrical installation at working voltages up to: – i. 450V/750V; or ii. 0.6/1 (1.2) kV But does not include g) armoured, metallic screened and metal sheathed cables; h) halogen free cables; i) cables with a Fire Rating; j) supply flexible cords (see B2.64) k) control cables where the insulation of the conductors are not individually coloured; l) cables with a conductor flexibility of Class 5 or greater according to AS/NZS 1125; (note 1:: cables that have a conductor flexibility of Class 5 according to AS/NZS 1125 are commonly known as Flexible Cables) m) cables not captured by the scope of AS/NZS5000.1 or AS/NZS5000.2 (note 2: the scope of AS/NZS5000.1 and AS/NZS5000.2 do not apply to polymeric insulated cables for special installations and service conditions or for which there are separate Standards)	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
Class specification: For working voltages up to 0.6/1 (1.2) kV—AS/NZS 5000.1 For working voltages up to 450/750 V—AS/NZS 5000.2				
Clothes dryer An electrical appliance that — (a) is a household type; and (b) is for drying textile material; but does not include— (c) a heated towel rail; or (d) a gas appliance having electrical connections Class specification Rotary type—AS/NZS 60335.2.11 Cabinet type—AS/NZS 60335.2.43	X			
Control or conditioning device An electrical device that— (a) is a household type; (b) is for controlling or conditioning the electrical input to electrical apparatus via outlet facility(s) of the condition or control device; (c) is portable; Note: for this definition portable includes devices with facilities for permanent installation if manifestly complete and useable without being fixed in position (eg has connection via appliance inlet or suppl cord and plug and doe not rely on being build in or being installed to prevent access to live parts). This also includes devices connected to supply by pins for engagement with a socket-outlet. (d) is self-contained, including devices that receive inputs from external sensors; and (e) connects to supply by means of a flexible cord and plug, appliance inlet or pins for engagement with a socket-outlet. Class specification: AS/NZS 3105	X			
Cooking appliance—portable type An electrical appliance that—	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
(a) is a household type; (b) is for cooking or warming food by electrical energy; and (c) is portable. Class specification: Griller, roaster or oven (including breadmaker)—AS/NZS 60335.2.9 Warming plate and similar—AS/NZS 60335.2.12 Frying pan, deep fryer or wok—AS/NZS 60335.2.13 Outdoor barbecue—AS/NZS 60335.2.78				
Cord extension socket An electrical device that— (a) is for attachment to a flexible cord; (b) has a maximum rating of 20 A at low voltage; and (c) has contacts whereby a detachable connection may be made with the corresponding pins of a plug or an inlet; but does not include— (d) a connector or appliance connector designated in AS/NZS 3123; or (e) a socket-outlet designated in AS/NZS 3131. Class specification: AS/NZS 3120	X			
Cord-line switch An electrical device that— (a) is for attachment in a flexible cord; (b) manually opens and closes an electrical circuit; and (c) has a rating not exceeding 16 A at low voltage; but does not include— (d) bell push and pendant switches. Class specification: AS/NZS 3127	X			
DC isolator An electrical device that— (a) is an air-break d.c. rated isolator; and	X			<i>* For certification requirements, please refer to the Information bulletins (Information and Advisory notices on the EESS website)</i>

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
<p>(b) is for connection to the wiring of a household photovoltaic (PV) electrical installation, other household renewable energy installation, or household energy storage installation. and includes—</p> <p>(c) any dedicated individual enclosure where the dc isolator is classified as enclosed outdoor</p> <p>NOTE1 A 'dedicated individual enclosure' includes a single dc isolator in an enclosure or multiple dc isolators in a common enclosure, but does not include the enclosure where the dc isolator is to be installed integral within a power conditioning equipment (PCE) enclosure or is to be installed in an enclosure that complies with a relevant standard for assemblies for use in photovoltaic networks.</p> <p>Class specification: AS 60947.3 for Australia IEC 60947-3 for New Zealand</p>				
<p>Decorative lighting outfit</p> <p>An electrical appliance that—</p> <p>(a) is for decorative, display or illumination purposes;</p> <p>(b) is portable;</p> <p>(c) consists of—</p> <ul style="list-style-type: none"> i. electric light sources or lampholders interconnected by flexible cord of less than 2.5 mm² cross-sectional area; or ii. electric light sources within a flexible enclosure; <p>(d) may be integral with a frame or similar support; and includes—</p> <p>(e) any integral power supply or control device.</p> <p>Class specification: Lighting chains - AS/NZS 60598.2.20 Rope lights - AS/NZS 60598.2.21</p>	X			
<p>Dishwashing machine</p> <p>An electrical appliance that—</p> <p>(a) is a household type; and</p>	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
(b) is for washing of eating and cooking utensils. Class specification: AS/NZS 60335.2.5				
Double capped light emitting semiconductor lamp An electrical appliance that— (a) is a tubular light emitting semiconductor light source; (b) is a double capped lamp; and (c) has integral, built-in or independent control gear but does not include— (d) a self-ballasted light emitting semiconductor light source within the scope of AS/NZS IEC 62560 Class specification: AS/NZS 60598.2.1 Appendix A	X			<i>Also known as “LED Tube”.</i>
Edison screw lampholder An electrical device that— (a) accommodates a lamp with an Edison screw cap of 14 mm or 27 mm nominal outside diameter; but does not include— (b) a lampholder that by design is restricted to specific appliances by forming part of a structural moulding of the appliance. This exclusion does not apply to lampholders that can be used in luminaires; or (c) a lampholder that is for incorporation in industrial equipment only. Class specification: AS/NZS 3140 or AS/NZS 60238	X			
Electric hot water bottle An electrical appliance that— (a) is for application of heat to parts of the human body; (b) is flexible; (c) contains liquid that is heated by internal electrical parts; and (d) has a projected area not exceeding 0.6 m ²	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
Class specification: AS/NZS 60335.2.81				
Evaporative cooler An electrical appliance that – (a) is a device that cools air through evaporation of water; (b) incorporates a fan for moving air; and (c) is fixed with one or more vents. Class specification: AS/NZS 60335.2.98	X			<i>Portable evaporative coolers are level 1 as they are not fixed devices.</i>
Fan An electrical appliance that— is a household type; (a) has a primary function of moving air in its vicinity for comfort or extraction purposes; and (b) is self contained and includes— (c) any associated ancillary equipment. Class specification: AS/NZS 60335.2.80	X			<i>Fans that blow a mist of water from a reservoir in front, or attached, or connected to the fan are included.</i>
Fence energizer An electrical appliance that regulates and controls the supply of electrical energy to an electrical fence. Class specification: AS/NZS 60335.2.76	X			
Floor polisher/scrubber An electrical appliance that— (a) is a household type; and (b) is used to polish or scrub floors. Class specification: AS/NZS 60335.2.10		X

	3	2	1	
<p>Fluorescent lamp ballast</p> <p>An electrical device that—</p> <ul style="list-style-type: none"> (a) is for controlling the magnitude of current flowing through the discharge path of a fluorescent (lamp); (b) is of the independent or built-in type intended for use with luminaires (portable or fixed); or (c) is of the integral type, rated at 60 W or less, such that it forms a non-replaceable part of a fluorescent lamp/ballast combination; or (d) is of the adaptor type such that it allows the insertion of a fluorescent lamp into the ballast by the user; <p>but does not include—</p> <ul style="list-style-type: none"> (e) a ballast that is incorporated in luminaires certified for compliance with the requirements for electrical and electronic equipment with increased safety type protection (Ex e) for use in hazardous locations. <p>Class specification:</p> <p>Integral (self ballasted lamp) magnetic and electronic types— AS/NZS 60968</p> <p>Other magnetic type—AS/NZS 61347.2.8</p> <p>Other electronic type—AS/NZS 61347.2.3</p>	X			
<p>Fluorescent lamp starter</p> <p>An electrical device that—</p> <ul style="list-style-type: none"> (a) is for starting preheat type fluorescent lamps; (b) is a glow-start type; and (c) has an enclosure of insulating material. <p>Class specification:</p> <p>AS/NZS 60155 (Section 1)</p>	X			
<p>Glue gun</p> <p>An electrical appliance that—</p> <ul style="list-style-type: none"> (a) is a household type; (b) is hand held; (c) is for melting and applying sticks of solid adhesive; 	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
but does not include— (d) a glue gun promoted exclusively to industry. Class specification: AS/NZS 60335.2.45				
Hair care appliance An electrical appliance that— (a) is a household type or a commercial hand-held type; and (b) is for drying, styling or the caring of human hair. Class specification: AS/NZS 60335.2.23	X			
Heating pad - flexible An electrical appliance that— (a) is for application of heat to parts of the human body; (b) is in the form of a flexible pad; (c) has a projected area not exceeding 0.6 m ² ; but does not include— (d) an electric hot water bottle. Class specification: Foot warmer and foot mat—AS/NZS 60335.2.81 Other—AS/NZS 60335.2.17		X		
Hedge clipper An electrical appliance that— (a) is for trimming hedges; (b) has one of more linear reciprocating cutter blades; and (c) is hand held. Class specifications: AS/NZS 60745.2.15 (withdrawal date 20 November 2021) or AS/NZS 62841.4.2	X			
Immersion heater An electrical appliance that— (a) is a household type; (b) is for heating liquid in that it may be immersed; and	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
(c) is self contained; and includes— (d) aquarium type immersion heaters. Class specification: Aquarium type—AS/NZS 60335.2.55 Portable (other than aquarium) type—AS/NZS 60335.2.74 Fixed type—AS/NZS 60335.2.73				
Insect electrocutor An electrical appliance that— (a) is a household type; and (b) kills insects by the application of electrical energy. Class specification: AS/NZS 60335.2.59	X			
Inspection handlamp An electrical appliance that— (a) is for inspection purposes using illumination; (b) contains an electric light source; and (c) is hand held; but does not include— (d) handlamps with a magnification facility. Class specification: AS/NZS 60598.2.8	X			
Iron An electrical appliance that— (a) is a household type; (b) is for smoothing or pressing fabric by the application of heat or steam; and (c) is hand held except for any separate steam generator; and includes— (d) any associated equipment. Class specification: Fabric steamer—AS/NZS 60335.2.85 Other—AS/NZS 60335.2.3	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
Kitchen machine An electrical appliance that— (a) is a household type; and (b) is for the preparation of food by mechanical means; or (c) is for opening cans; or (d) is for sharpening of knives. Class specification: AS/NZS 60335.2.14	X			
Lawn care appliance An electrical appliance that— (a) is a household type; and (b) is for cutting grass or lawn. Class specification: Mower—AS/NZS 60335.2.77 Trimmer—AS/NZS 60335.2.91 Grass shears—AS/NZS 60335.2.94 Robotic lawn mower—AS/NZS 60335.2.107	X			
Light emitting semiconductor lamp (self-ballasted) An electrical appliance that— (a) incorporates a light emitting semiconductor light source; and (b) has any additional elements necessary for stable operation of the light source incorporated within the lamp body and permanently connected to the light source; and (c) has a rated voltage greater than 50 V and up to and including 250 V; and (d) is intended for connection to supply via means of lamp cap for insertion into a lampholder. but does not include— (e) a double capped light emitting semiconductor lamp. Class specification: AS/NZS 62560	X			<i>Also known as “self-ballasted LED lamp”</i>
Lampholder adaptor	X

Power supply (electronic or ferromagnetic types) designated for use with specific electronic (IT, audio, video) equipment—AS/NZS 60065 or AS/NZS 60950.1 or AS/NZS 62368.1 (these standards cannot be used as substitutes for other power supplies listed in the class specification) Power supply for lighting purposes— <ul style="list-style-type: none"> • Electronic types: • Light emitting semiconductor driver — AS/NZS 61347.2.13 • Other—AS/NZS 61347.2.2 • Ferromagnetic type: AS/NZS 61558.2.6 Battery charger—AS/NZS 60335.2.29				
Projector An electrical appliance that— <ol style="list-style-type: none"> (a) is a household type; and (b) is for projecting an image from a photographic slide or moving film. Class specification: AS/NZS 60335.2.56		X		
Range An electrical appliance that— <ol style="list-style-type: none"> (a) is a household type; (b) is for cooking food using heat produced by electrical energy; and (c) is stationary. Class specification: Fixed outdoor barbecue—AS/NZS 60335.2.78 Other—AS/NZS 60335.2.6	X			
Range hood An electrical appliance that— <ol style="list-style-type: none"> (a) is a household type; (b) collects and/or filters air; and (c) is for installation above, or adjacent to, a cooking appliance. Class specification:	X			

 Contents Equipment type and definition	Risk Level			Comments
	3	2	1	
AS/NZS 60335.2.31				
Razor/hair clipper An electrical appliance that— (a) is a household type; and (b) shaves, cuts or trims human hair. Class specification: AS/NZS 60335.2.8	X			
Recessed Luminaire—light emitting semiconductor type An electrical appliance that— (a) incorporates a light emitting semiconductor light source; and (b) has any additional elements necessary for stable operation of the light source incorporated within or permanently connected to the device; and (c) has a rated voltage greater than 50 V and up to and including 250 V; and (d) is designed to recessed into a ceiling, wall or floor. but does not include— (e) a double capped light emitting semiconductor lamp; (f) a light emitting semiconductor lamp (self-ballasted); (g) an electrical device that is intended to product light for illumination purposes in commercial or industrial applications; (h) ground recessed luminaires (IEC 60598-2-13); (i) recessed air handing luminaires (AS/NZS 60598.2.19) (j) recessed liquid cooled luminaires; (k) emergency lighting fixtures (AS/NZS 60598.2.22); (l) fans with integral luminaires (AS/NZS 60335.2.80). Class specification: AS/NZS 60598.2.2		X		
Refrigerating appliance An electrical appliance that— (a) is a household type; and (b) cools and stores food. Class specification:	X

AS/NZS 60335.2.24				
Residual current device An electrical device that— (a) isolates or initiates a tripping signal to isolate a low voltage supply to protected circuits, socket-outlets or equipment in the event of a current flow to earth that exceeds a predetermined level; (b) may be fixed or portable; (c) has a rated residual current not exceeding 300 mA for devices intended for connection to fixed wiring or 30 mA for other devices; and (d) has a rated load current not exceeding 125 A for devices intended for connection to fixed wiring or 20 A for other devices; but does not include— (e) a device intended to be used with a particular circuit breaker other than a miniature overcurrent circuit-breaker; or (f) a device intended to protect an electricity supply authority distribution system; or (g) a device covered by AS 2081 and intended for mines use. Class specification: Without integral overcurrent protection—AS/NZS 3190 or AS/NZS 61008.1 With integral overcurrent protection—AS/NZS 3190 and AS 3111 or AS/NZS 61009.1.	X			
Room heater An electrical appliance that— (a) is a household type; and (b) is for heating, by electrical energy, for comfort purposes; and includes— (c) an appliance that accommodates one or more heat lamps; but does not include— (d) an air-conditioning appliance; (e) a heating system that is intended to heat the atmosphere of a room primarily by raising the temperature of any floor, wall, or ceiling area; or	X

(f) an under-carpet heating system. Class specification: Thermal storage type—AS/NZS 60335.2.61 Other—AS/NZS 60335.2.30				
Sewing machine An electrical appliance that— (a) is a household type; and (b) is for stitching fabric or other material. Class specification: AS/NZS 60335.2.28		X		
Simple portable luminaire A portable luminaire, in which the supply flexible cord (including any associated cord line switch) is terminated to a single lampholder that is mounted on a non-flexible, non-articulated stem in which the cord may be enclosed, that— (a) only includes one or more of the following components that comply with the relevant Standards: Edison screw lampholder to accommodate screw cap of 14 mm or 27 mm nominal outside diameter or bayonet cap lampholder that accommodates a lamp with a bayonet cap of 15mm or 22 mm nominal diameter, a cord line switch, supply flexible cord and plug; and (b) is for use with light sources that have bases for insertion into E27, E14, B15 or B22 lampholders; and (c) is of the ordinary type for indoor use only; but does not include— (d) a transformer; (e) a dimmer or touch controls or other electronic devices or portable luminaires of type covered in AS/NZS 60598.2.8 and 60598.2.10. Class specification: AS/NZS 60598.2.4 or AS/NZS 60598.2.4 Annex ZA		X		
Socket-outlet	X
